### **DETAILED ACTION**

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

2. Claims 1-52 are presented for examination.

### ***Election/Restriction***

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-41, 43-52, drawn to application programming interfaces, classified in class 719, subclass 328;
- II. Claim 42, drawn to processor architecture, classified in class 712, subclass 1.

The inventions are distinct, each from the other because of the following reasons. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I can be used to execute program tasks without performing processor design, and invention II has separate utilities such as hardware/software co-design without task execution. See MPEP § 806.05(d).

Art Unit: 2126

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different searches and their recognized divergent subject matter, and the search required for one Group is not required for another, restriction for examination purposes as indicated is proper.

4. It is noted that claims 49, 50 contain inappropriate dependents.

Claim 49 recites "The method of claim 1 wherein" in line 1, which is an inappropriate dependent.

Claim 50 recites "The method of claim 1 wherein" in line 1, which is an inappropriate dependent.
